Languages

English: 4 Skills ~ B2

+ TOEIC L&R: 620

+ TOEIC S&W: 260

Experience

2023-8 -
2023-12

Back-end Developer (Nodejs developer)

Finviet

- Responsibilities: I am accountable for crafting resilient APIs through two channels: RESTful and WebSocket. This involves ensuring seamless communication with front-end systems, integrating diverse partners like Viettel Post, Titkul (tuition), VinalD (tuition), and overseeing functionalities such as VPBank account registration. Additionally, I take charge of addressing, troubleshooting bugs, and implementing fixes to guarantee the smooth operation of systems.
- Technologies: Javascript, Node, NestJS, Redis, MongoDB, RabbitMQ, Angular, etc. My approach to frameworks and libraries is flexible, tailored to the specific requirements of each project.

2022-10 -
2023-04

Front-End Developer (Internship, Probation)

Kyanon Digital

- Responsibilities: Front-end Developer role, Fix bug, Estimate the time to complete the FE task for PM to quote
- Participating in 4 real projects: 1 project just started, 3 projects launched
- Coordinate with Backend and UX/UI team to build Features for Singapore customers' e-commerce website
- Depending on the project use different libs/frameworks/technologies like: React, NextJS, Webpack, Typescript, etc.

2022-06 -
2022-09

Web Designer (Full-time Employee)

BMS Golbal

- Responsibilities: Build sales website, Landing page, Build sample interface warehouse for customers to choose
- Using CMS Wordpress in 100% of projects, Themes are mainly Elementor, Flatsome and customize some features
